THE BLACKPOINT CYBER
ECOSYSTEM

Nation-State Cybersecurity Working for You

In the cyberthreat landscape, MSPs are finding themselves in the crosshairs of advanced attackers. To take the target off your back, we created the Blackpoint ecosystem – a fully managed, integrated ecosystem of services with our powerful nation state-grade MDR technology at its core.

Our partners rely on us for high-performance, easily upgradeable, and robust cybersecurity that can protect against today's and tomorrow's threats every time. **Win the unfair fight with Blackpoint Cyber in your corner.**

THE COSTS OF DIY CYBERSECURITY

Building your own security team? Consider the costs. The formula below shows the average monthly cost to set up and manage an in-house, 24/7 managed detection and response (MDR) operation for 100 endpoints.

Labor		Rent + Utilities		Hosting + Equipment		MDR Tech
$50,000	+	$7,000	+	$1,000	+	$2,500

= $60,500 per month

Your cybersecurity stack needs to provide meaningful visibility across an IT environment. Designed with MDR objectives and workflows in mind, we ensure you are collecting the right information, not mass information. True value is in real-time data interpretation allowing for immediate action. **Here's where the Blackpoint Cyber ecosystem comes into play.**

Explore the Ecosystem

The ecosystem ensures that all facets of security work in tandem to support an integrated and streamlined cyber strategy. Combining network visualization, insider threat monitoring, traffic analysis, and endpoint security, Blackpoint's expert team rapidly detects and neutralizes lateral movement in its earliest stages.

AT THE CORE: MANAGED DETECTION & RESPONSE

MDR

True 24/7 MDR. Blackpoint's patented MDR solution is the first contextually aware breach detection and response program on the market. With unparalleled visibility into hacker tradecraft, lateral spread, and remote privileged activity, we stop advanced attacks immediately.

ESSENTIAL COMPONENTS OF THE CYBERSECURITY OFFERING

Cloud RESPONSE

Cloud infrastructures actively secured. Extend the power of MDR and bring 24/7 expert security monitoring and a unified response to your cloud workflows. Trust leading edge cybersecurity to actively defend your cloud platforms, hybrid environments, and everything in between.

MANAGED Application Control

Curated Zero Trust, by Blackpoint. Managed Application Control provides our partners with simplified oversight into what matters most. With Blackpoint's MDR capabilities and threat insight, you can apply curated application settings to your and your clients' extended perimeters. Reduced operational bottlenecks, while improving user experience, today.

GUARDING THE PERIMETERS: BLACKPOINT ADD ONS

LogIC

Hyper-efficient logging and compliance. Leave complicated installs and agent rollouts in the past. Quickly configure log settings, generate compliance reporting, and automatically map against hundreds of compliance requirements all at once with push-button setup. Finally, the future of compliance is here.

BLACKPOINT RISK

Cyber liability insurance for MSPs. Fact – if you have sensitive data, you have cyber risk. Paired with our MDR solution, Blackpoint RISK keeps you and your clients secure. Receive tailored policies to fit your specific industry and organization size so you can live to fight another day in this cyber landscape.

Thrive, not survive, in the threat landscape

Our world-class cybersecurity ecosystem is designed to serve our partners by completing the hard work for you. Trust Blackpoint Cyber to provide a streamlined onboarding experience so you can get coverage without compromising your efficiency.
