

Why a Security Ecosystem is the Best Next Move

Partnering with a cybersecurity vendor that offers a suite of solutions can streamline the customer experience, ensure predictable margins, improve your insurability, and help cover the five pillars of cybersecurity.

Simplified Management

- Save time on deployment, onboarding, and training
- Easily maintain multiple functions within one tool
- Experience seamless solution integration and compatibility

Operate With Predictable Margins

- Benefit from streamlined billing
- Grow as you save with bundled offerings

Pave the Path to Insurability

- Gain credibility with SOC efficacy
- Operate with consistent policies, avoiding security gaps
- Utilize hyper-efficient logging and compliance capabilities

Cover NIST's Five Pillars of Cybersecurity: Identify, Protect, Detect, Respond, Recover

Take it a step further with Blackpoint's rendition:

- **Asset visibility**
 - Allow expert security analysts to keep an eye on your on-premises and cloud environments
- **Network hardening**
 - Utilize internal, external, and cloud threat detection to stay one step ahead
- **Threat detection**
 - Partner with expert MDR analysts looking out for threats around the clock
- **Real-time response**
 - Benefit from a 24/7 SOC responding to threats immediately
 - Stay protected with real-time response to emerging IoCs and threats
- **Incident response**
 - Benefit from quicker resolution through a cohesive stack
 - Add cyber liability insurance to your stack to bounce back safely

Minimize your vendor list to the core vendors that provide the above coverage and maximize their value by utilizing their entire suite of services. Doing so will greatly benefit the security and productivity of all businesses you protect.

With native interoperable technology, Blackpoint combines network visualization, insider threat monitoring, anti-malware, traffic analysis, and endpoint security into an end-to-end cyber strategy to protect you.
