

WORLD CLASS MANAGED DETECTION + RESPONSE (MDR)

Blackpoint Cyber offers the only **world-class, nation state-grade cyber security ecosystem** serving the MSP community.

Using its own software and SOC, Blackpoint's True 24/7 Managed Detection and Response (MDR) service not only **detects breaches earlier than any other solution on the market**, but also provides an **actual response rather than just an alert** - keeping your network and your clients' networks safe from widespread damage.

HIGHLIGHTS

FORMER NSA CYBER
SECURITY ANALYSTS

RAPID
CONTEXTUALIZATION
OF THREATS

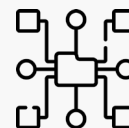

RECORD-BREAKING
RESPONSE TIME

ABILITY TO DETECT
AND RESPOND IN
ONE PLATFORM

COMPETITIVE
PRICING

MAPPING TO THE
MITRE ATT&CK®
FRAMEWORK

"I can't recommend Blackpoint Cyber enough, their team, products, and solutions have been leveraged by me several times in a multitude of different environments from a proactive solution as well as a reactive/containment/remediation environment."

Chris Hegg, Phoenix Technology Consulting
