

Introducing the **Blackpoint Community Protection Program**

Blackpoint Cyber is dedicated to empowering Managed Service Providers (MSPs) with superior software solutions, paired with elite human talent, to proactively identify and prevent damage from threat actors. In our continuous effort to support and enhance the MSP community, we're thrilled to unveil the next evolution of our NFR license program: the Blackpoint Community Protection Program (BCPP).

Reduce Risk

Mitigate risks faster with a security partner who responds on your behalf.

Prioritize Customer Satisfaction

With *your* business protected, you can focus on your customers cloud.

Deploy Within Minutes

Time is of the essence. Remote deployment with no downtime.

One vendor. Comprehensive protection.

- Active Response
- Endpoint Tradecraft Protection
- Cloud Tradecraft Protection
- Real-Time Ransomware Response
- Malware Protection
- Identity Tradecraft Protection
- Credential Breach Identification
- Application Control
- Vulnerability Management

WHAT'S NEW

BCPP provides new and existing partners with **free, internal use licenses for six months**, which includes 24/7 support from our Security Operations Center (SOC). This initiative is designed to let MSPs fully experience the benefits of using Blackpoint's solutions to manage, protect, and realize the business value you can provide to your customers.

ELIGIBILITY

BCPP is open to all existing and prospective MSP partners. Partners will gain access to our 24/7 SOC and product bundle, Blackpoint Response, free for six months for internal use. Once a partner reaches 500 endpoints under active management, BCPP will be free for as long as they maintain that threshold.

Ready to get started?

[SIGN ME UP](#)

The Blackpoint Community Protection Program replaces the MSPProtect program. Terms and conditions apply.
