

Threat Assessment Summary

Showcase continuous value to your clients with a clear view of their security risk posture

HELP CLIENTS AND PROSPECTS UNDERSTAND THEIR RISK WITH A WINDOW INTO THEIR ON-PREMISES AND CLOUD ENVIRONMENTS.

GAIN VISIBILITY OVER:

ON-PREM

High-risk applications, RMM tools, OS's, and BitLocker status

CLOUD

Login map, failed logins, cloud policies, cloud users (Requires Cloud Response)

USERS

Privileged accounts and account types

CIS CONTROLS

Maps to CIS Controls to determine whether controls are met, and if so, how

Do you struggle to demonstrate cybersecurity value to clients and prospects? When businesses skimp on security believing they won't be breached, they're at greater risk for attack.

If only they had better visibility over their risk posture.

With Blackpoint's Threat Assessment Summary, you can help clients and prospects clearly understand their risk. Position yourself as a trusted advisor and drive business growth by offering cybersecurity solutions tailored to your clients.

- Gain a touchpoint to engage clients and propose solutions to mitigate risk
- Grow your business by demonstrating value during the sales cycle
- Establish a risk score that can be assessed and tracked over time
- Improve customer loyalty by reducing downtime and business disruption
- Gain a structured approach to performance review meetings

Don't wait for a breach to showcase your cybersecurity value to your clients. With a Threat Assessment Summary, you can demonstrate continuous value, improving customer acquisition, retention, and advocacy—and bolstering your reputation as a trusted advisor.
