One Platform. Complete Context. One Clear Path to Security Outcomes.

CompassOne

CompassOne brings managed detection and response together with prevention and compliance in one platform. Behind it is a SOC trained on offensive security that catches what other tools miss and acts without waiting for confirmation. Threats get caught sooner and risk gets prioritized. As a result, your clients' security programs mature, and you've got a compelling answer the next time a client questions what they're paying for.

Connected Capabilities. Complete Protection.

Unified 24/7 Detection and Response

Expert analysts, adversary intelligence, and patented lateral detection provides always-on protection across endpoints, cloud, and identities.

Vulnerability Management

Know which risks to fix first.

Cloud Posture

Catch risky cloud changes early.

Application Control

Block risky apps before they cause harm.

Asset Inventory

See every device and user at a glance.

Security Posture Rating

Should clients progress and demonstrate ROI.

SIEM

Automate compliance mapping.

61% of SMBs worry that a cyberattack will put them out of business.

ConnectWise,
The State of SMB Cybersecurity in 2025

blackpoint

Simplify Operations. Accelerate Response. Prove Impact.

Protection that delivers results.

- **Stop threats fast:** AI-driven detection and response contains threats in under two minutes on average.
- **See the big picture:** Contextual insights connect risk across exposed users, devices, and applications.
- **Remediate what matters:** Address prioritized risks first to quickly make a big impact.

Reduce complexity and consolidate your stack.

- **Simple to deploy and manage:** Scale at speed with multi-tenant management in a single view.
- **Unified security:** Reduce tool sprawl with detection, response, prevention, vulnerability management, and compliance in one platform.
- **Integrate your stack:** Connect endpoint, cloud, network, vulnerability management, password management, and business operation tools.
- **Reduce manual tasks:** Automate tasks such as cloud policy enforcement, ticket workflows, and more.

Prove security value with measurable outcomes.

- **Benchmark and mature:** NIST-based scoring shows clients where their program stands and how it evolves.
- **Build client trust:** A clear story backed by numbers helps you be their trusted security advisor.
- **Demonstrate ROI:** Provide executive-level insights and reports that prove your security program is performing.
