SNAP DEFENSE

COMPLIANCE FOR NIST 800-171

blackpoint

Companies in every industry have an obligation to not only secure the information they collect, but also to stay compliant with the regulations that are in place for each of their particular industries. This may seem like an extremely daunting task, but these regulations are in place to improve information security. Also, non-compliance can result in severe fines.

SNAP-Defense is a Next Generation Security Operations and Incident Response platform, **providing the best early-stage breach detection and response capabilities on the market.** Auditing is made easy with a convenient reporting module built-in to the platform. Generate dynamically updated reports with the click of a button. Support links are included in the report to immediately access the relevant data from SNAP-Defense for each supported sub-section of the framework.

With SNAP-Defense alone, organizations can address over half of the NIST 800-171 compliance checklist. When integrated with an anti-virus solution, the suite addresses over two-thirds of the checklist.

KEY BENEFITS:

- GENERATE DYNAMICALLY UPDATED COMPLIANCE REPORTS WITH THE CLICK OF A BUTTON

- SAVES TIME AND MONEY

- EASY-TO-USE

- PROVIDES A COMPREHENSIVE CHECKLIST OF REQUIREMENTS

- BEST EARLY-STAGE BREACH DETECTION AND RESPONSE ON THE MARKET

> As part of the SNAP-Defense Compliance module, we have utilized and expanded upon that information into a **robust compliance reporting framework.**
>
> SNAP-Defense customers are now able to generate dynamically updated compliance reports **at the push of a button.**

- ✓ NIST 800-171
- ✓ PCI-DSS
- ✓ HIPAA
- ✓ NYCRR-500
- ✓ ISO/IEC-27001

Mike Kelleher,
Executive Director of the MD Manufacturing Extension Partnership

"Our manufacturing sector customers have a distinct need for a cost-effective, easy-to-use, and efficient cyber defense stack and SNAP-Defense fits that bill for us. In addition, new regulations in Federal Defense contracting by DFARS requires defense contractors to have a plan for NIST 800-171 and the addition of the SNAP-Defense compliance module is a no-brainer for our companies. We have formed a strategic partnership with Blackpoint and are happy to provide a next-generation cyber defense offering that also helps satisfy tedious compliance requirements."
